DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1 is drawn to a method of making a composition, classified in class 514, subclasses 558 and 866.
- II. Claims 2-9 are drawn to a composition comprising phytanic acid or a derivative, classified in class 514, subclass 558.
- III. Claims 10-13 are drawn to a method of treating or preventing NIDDM with phytanic acid, classified in class 514, subclasses 558 and 866.
- IV. Claims 14-18 are drawn to a method of increasing cellular glucose uptake with phytanic acid, classified in class 514, subclass 558.
- V. Claim 19 is, drawn to a method of reducing plasma insulin with phytanic acid, classified in class 514, subclass 558.

The five inventions are independent distinct, each from the other as they have acquired a separate status in the art as shown by their separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

The applicants are required to elect a single invention for examination purposes.
